

Ansathus

Black Acoustic

Product - Information

Post-apocalyptic progressive rock from Germany - gloomy guitar sounds meet atmospheric synths, while the vocals sometimes dreamy, sometimes desperate tell of memories, love, pain and hate in a lost world.

The duo's debut album "Ansathus" features seven songs whose atmosphere transports the listener into a dystopian world - radioactivity, violence, dust and a spark of hope. An accurate description of the album "Black Acoustic".

While in some songs the end-time scenario in the lyrics is only revealed between the lines, the track "Wasteland" probably shows most clearly where the inspiration for the lyrics comes from.

When guitarist, composer and singer Marcel Schiborr wrote the first songs, he had no idea of this theme. But singer and songwriter Veronika Bliss felt immediately transported to the future scenario of one of her favourite computer games.

The musical result will be released worldwide on 12.11. as download and stream in all well-known shops. At the same time, a music video of the song "At the Lake" will be published on YouTube.
